The Ceremonial Mace

Carried at the head of the procession today for the first time, The Evergreen State College Mace is the gift of Academic Vice-President and Provost Byron Youtz, who donated the materials, and Faculty Member Earle McNeil, who gave his time and talent in its creation.

The Mace is rich in symbolism. Beginning with a square core of Western maple, McNeil laminated narrow strips of walnut to maple and attached these to the core in a cross design. At the open corners he inserted bubinga, a wood red in color and rich in grain. This cylindrical, three-foot, main column represents the tree of life or Word of creation with the red bubinga also symbolic of the sun. Nine grooves inlaid with copper denote the nine levels of life from animal spirit to enlightenment. The copper bands suggest the bonding forces of life.

McNeil expects to do further work on the cap of the mace which is now an octahedron, a crystal shape of purity and perfection. Representing the centralizing impulse for the tree of life, each of its eight faces is inlaid with a disc. The top four symbolize the main characteristics of the human mind: wisdom, innocence, introspection, and illumination. The lower four signify ways of experiencing the world through thinking, feeling, intuition and the senses.
