Faculty sponsors from eleven part-time studies programs at The Evergreen State College will be on hand January 7 at 7:30 p.m. in Lecture Hall Two to discuss their Winter Quarter course offerings.

Academic Dean Rudy Martin said the special "Living Catalog" session will offer interested community persons an opportunity to meet faculty sponsors and discuss program content of the modular courses.

Registration for the one-credit modules, which are equivalent to four quarter hours of credit, will be held January 8 from 8 a.m. to 7:30 p.m. and January 9 and 10 from 8 a.m. to 5 p.m. in the Office of the Registrar, Seminar Building.

Module offerings and their faculty sponsors are: Introductory Physics taught by Lee Anderson; Philosophy of Science, by Will Humphreys; Calculus with Analytic Geometry by Charlie Lyons; Mathematics for the Uninclined by Richard Brian, Pre-Calculus Mathematics by Fred Young; Introduction to Organic Chemistry by Michael Beug; Basic Ecology by Ed Kormondy; Autobiographical Writing by Earle McNeil; Stage Lighting by Keith Smith; Nepali Language by Willie Unsoeld; and Law and Ecology: Environmental Law by Oscar Soule.

Registration fees for persons interested in earning academic credit as "special" students are \$80 per module. Auditing students --- those not wanting formal evaluation or credit --- may enroll in the programs for \$20. Interested persons should contact the Registrar's Office, 866-6180, or the modular course instructors for more information.
