**earth fair '82**

**WELCOME TO EARTH FAIR'82**, a day dedicated to the understanding, appreciation, and celebration of the Earth. In the past, it has been difficult to celebrate in the face of so many environmental problems. Today's program is designed to empower us as individuals with knowledge and skills necessary to soften the impact of human activities on the natural environment. Some of the events will help us recognize what the natural environment needs to survive and maintain its balance. Other lectures and events will teach us as individuals and us as communities how we can work with the natural cycles of the Earth in our use of resources. After all, the health of the human race is dependent on the health of the Earth.

We encourage everyone to take some time to enjoy the natural beauty of the Evergreen campus. There are two well-marked trails: one to the Organic Farm, about a half-mile round-trip, and one to Eld Inlet, about one mile round-trip. Feel free to ask for directions.

Through the day on **RED SQUARE** or if the weather is bad in the **LIBRARY LOBBY**, there will be food, craft, and informational booths.

ALL EVENTS FREE

10:00 a.m. **THE SHORELINES MANAGEMENT ACT AND THE NISQUALLY DELTA:** A member of the Nisqually Delta Association will present slides and discuss the history and current status of the Nisqually Delta Controversy.
