

March, 1971

Volume 3, Number 3

NEWS NOTES

Evergreen's long-awaited admissions rush is on now that the catalog, mailed during the first week of February, has begun finding its way into the hands of students in all corners of the state. The latest count shows that about 180 students have been accepted for admission, most of them incoming freshmen from scattered points around the state. Heaviest concentrations of selected students are from the Olympia, metropolitan Seattle and Tacoma areas. Initial applications--still coming in daily to the admissions office--now total more than 1,150, with an equal split in numbers between males and females. Student interest obviously is running high, judging from the numbers of phone calls and personal visits being made to the campus. And, with more than 5,000 catalogs now in circulation, interest seems to be gaining with each passing day.

February 18 was a landmark day for Evergreen, at least from an historical standpoint. On that day a special review team--composed of admissions personnel and faculty members--selected 79 graduating high school seniors and college transfers as the first group of Evergreen students. The selection process has rolled along in high gear since then and will continue until May.

And, this reminder from Sally Hunter: Copies of the catalog are available only through the Office of Admissions, whether the request originates on or off campus. And, because the supply is so limited, staff members are advised that not more than 25 catalogs can be issued at one time to any given office. This assures some control over distribution, a step that is necessary because of the per-unit costs involved.

* * *

Evergreen has appointed its first woman faculty member. She is Mary Ellen Hillaire of Olympia, who currently is Supervisor of Manpower Development for the State Division of Vocational Education. Her appointment is effective next September, according to Vice President and Provost David G. Barry. Miss Hillaire initially will be assigned as a member of Evergreen's three-quarter Contemporary American Minorities Coordinated Studies Program. Miss Hillaire, a Lummi Indian, holds bachelor's degrees from Western Washington State College and University of British Columbia and a master's degree from Western Washington. She was a social worker and casework supervisor for the Whatcom County Department of Public Assistance from 1957 to 1966, when she assumed her present position. Miss Hillaire is a member of the White House Conference on Children and Youth, serving as part of a Department of Labor Task Force which is evaluating manpower development and training programs for Indian people. In 1970 she was awarded Western Washington State College's Distinguished Alumnus Award, for outstanding service to humanity.

* * *

Another critical activity--one that has consumed vast amounts of the time and energy of Evergreen's academic planning staff--is the recruitment of the 36 new faculty members who will join us next September. The new faculty, expected to be under contract before the end of March, will join the 18 faculty planners who have been on the scene since last September.

The recruiting process began with a list of about 7,000 names, including prospects from across the country and from many other nations. By mid-February the list was pared down to 70 finalists, all of whom were interviewed, told the details of Evergreen's distinctive academic offerings and introduced to various staff members. Interviewing of the top-priority candidates to operate the Coordinated and Contracted Studies Programs concluded at the end of February. Those selected will receive confirming letters shortly.

* * *

Also from Evergreen's academic side, this progress report from Vice President and Provost David Barry:

Public Affairs Planning--The Provost's office has increased planning and recruiting efforts in Public Affairs. Letters have gone out soliciting recommendations for candidacies for the deanship, and nominees will soon be contacted and asked to submit vital information on which to base the selection of prime candidates.

Disappearing Task Forces (DTFs)--DTF activity continues at a fast pace. Final reports and recommendations have been received from a number of DTFs, including Contracted Studies, Admissions and Orientation Week. The DTF on Contracted Studies has been asked to remain intact for a short time to consider possible revisions of its report; the DTFs on Admissions and Orientation have been dissolved since their tasks have either been completed or assumed by other campus groups. Preliminary reports have been received from two recently constituted DTFs, those on Sabbatical Leaves and Faculty Status and Tenure. The academic deans are presently in the process of creating several new DTFs to consider problems of evaluation, faculty orientation planning and the position of the arts at Evergreen.

* * *

The following article is another in a series designed to help acquaint members of the Evergreen staff and surrounding community with the activities of various departments at the college. The guest author is John Finley, Dean of the Division of Developmental Services:

The Division of Developmental Services has as its primary purpose the encouragement and facilitation of student development. In the context of what is planned as the Evergreen experience--the building of a community of learners--the Division of Developmental Services will be an integral part of that community and all of its services, both traditional and otherwise, will be geared to the facilitation of learning. Conventional student services such as health, counseling, financial aid, campus security and student activities will be provided by Evergreen but provided in such a way as to involve as many students as possible in the planning and execution of said services

The more traditional view of student services, as services merely rendered to students in rather inflexible ways, will not be the mode of operation at Evergreen--rather they will be services geared at working with students to facilitate their intellectual and social growth.

The Evergreen concept of building a community of learners who, rather than competing with each other, are committed to helping each other, is the most exciting aspect of the coming Evergreen experience. The Division of Developmental Services will conduct all of its activities in ways that encourage the furtherance of this most necessary and humane concept.

The college community will have the same kinds of potential that the general community has--and will face many of the same problems. As is true in the general population, the degree of assistance needed by individuals within the student body will vary widely, based on the kinds of experiences individual students bring to the campus. We must have entrees into the student population so that these needs can be constantly assessed and appropriate action taken to meet those needs.

One of the best ways to have that entree and enhance the concept of helping is through the utilization of students as counseling aids, as health aids, as tutors, as security assistants and so forth.

The building of a feeling of community is critical to the humane operation of any institution, but becomes even more critical when the central theme of that institution is helping a fellow human being increase his capacity for learning. Essential to the building of a feeling of community is having people able to exercise some influence in the way in which that community operates. Evergreen is committed to insuring student participation in the decision-making processes on campus. One of the basic difficulties faced by many of our colleges and universities, and one leading to much disruption on campuses, is the alienation felt by too many students. As Evergreen grows over the coming years, we must constantly gear all our programs to the enhancement of the concept of caring and sharing.

The idea of caring, however, has little relevance for a college campus today, if that caring and helping hand is not extended to the community outside the college perimeters. The aloofness with which colleges have often viewed themselves and have been viewed by the surrounding community is self-defeating and alien to the idea of Evergreen. We mean to provide opportunities where the community people can become involved in the educational processes at Evergreen--as tutors, as counselors, as confidants, as lecturers, as performers, and as advisors.

By the same token, we intend to work with local organizations, both public and private, to involve our students in a host of activities--as tutors in local schools, as companions to psychiatric patients, as aids in the hospitals, as participants in community events, as information gatherers for various groups and so forth.

We will also be generating those kinds of activities which students can become involved in for some amount of pay, because in the rich mix of students anticipated at Evergreen, there will be those who will need financial assistance. In this regard we will be meeting with business and civic leaders in the community to plan for those activities which will be mutually beneficial to the community and to the students.

Out of all of these experiences will flow many activities both on and off campus--group discussions, seminars, films, field trips, lectures, etc., which will benefit the total community and will help bridge some of the unfortunate gaps which will have divided the campus from the community.

The development of a health delivery system for Evergreen students will have to be worked out in close cooperation with local medical authorities. An additional 1,000 people, plus faculty and other college personnel, pose rather serious consequences for the community if the plan for their care is not worked out on some mutually satisfactory basis.

Students will be involved in the planning and execution of Evergreen's security operation. There are numbers of ways in which students can participate in the working program; in traffic control, property watchman service, student assistants to security officers, etc. Those persons who will be in charge of campus security have to be people who understand young people and relate to them. They have to

be willing to provide necessary supervision and must be able to listen to student suggestions and incorporate them into the security system when useful. Evergreen personnel has been, and will continue to meet with local law enforcement agencies to work out those arrangements so necessary to a fair and just practice of judicial prudence on campus.

Our counseling service will operate principally as an outreach function--going out and seeking the student rather than waiting for the student to come in. A major portion of the counselor's time will be spent, not at a desk, but out in the campus community rapping with students, uncovering difficulties and striving to correct those difficulties. Our Counseling Office will be using many students in its operation to support the helping idea as well as to give the essential ties to the student body so necessary for effective counseling service.

Evergreen's physical recreation program will be geared at meeting the needs of the total college community. Evergreen will not initially have a Department of Physical Education, nor the traditional inter-collegiate sports, but will provide a wide variety of opportunities for students to participate in sports activities of their choosing. The Recreation building is geared to accommodate many kinds of physical education activities and we anticipate building quite an exciting sports program. We see hikes, skiing, mountain climbing, camping, boating, intermural sports, contests of various kinds between students and community, all part of our recreational efforts.

Another area of vital concern to us is housing for our students. I recently met with the Chairman of the ECCO subcommittee on housing to begin working out details for finding student housing in the community. As most of you know, we will have 428 units available for students in the fall which means that a vast majority of our people will have to live in the community. As Evergreen grows through the coming years there will never be enough on-campus housing.

I would hope that as Evergreen grows, many townspeople will use the campus as a base for personal activities. We look forward to working with them through the coming years to do the kind of educational job so needed by our community, the state and the nation.

* * *

Evergreen's Committee on Governance (COG) has finished its many weeks of deliberations and has a draft report ready to submit to the campus community in the near future. "All staff members are asked to read the report carefully and offer written responses to the proposals outlined in the draft," says COG Chairman Don Humphrey. "Once we've received all the feedback from interested staff, we'll prepare a final report for presentation to the president."

COG was formed in response to requests from the Evergreen community and was charged with looking at the questions of campus governance and systems of decision making and with drafting a report carrying specific recommendations for action. The primary committee was composed of faculty, classified and non-classified staff and students. The membership then was split into five sub-committees, which studied such matters as state laws governing higher education; means by which decisions are now reached; models and systems of various kinds of governance procedures in other institutions; and potential governance problems that might be faced in the future. Minutes of COG meetings have been

circulated throughout the Evergreen community and all persons offered the opportunity to make inputs into the studies. The process included interviews with many staff members and consideration of position papers turned in by interested persons.

All of this material was assembled and coordinated in mid-February when COG members convened for a final time to draft the position paper about to be released. Alterations, if necessary, will result from reactions by members of the Evergreen community. The COG report also will be discussed late in March during a committee retreat with the Board of Trustees.

* * *

Evergreen's library collection continues to grow by leaps and bounds, according to word from Staff Librarian Malcolm Stilson. Some 52,092 of the approximately 75,000 hard bound books needed for opening day already have been purchased, including 542 ordered during February. Stilson says the college now has 160 out-of-print books on microfilm, including Gosnell's Negro Politicians. Also on hand are microfilms of such underground newspapers as the Los Angeles Free Press and the Berkeley Barb, plus a complete set of the Wall Street Journal, which, we understand, is an "above-ground" newspaper. The library also has acquired a complete set of Wilson's Periodical Indexes--including the Reader's Guide, Art Index, Social Science Humanities Index, etc.--and the New York Times Index.

In addition to the large number of books, the library staff continues to order and process other material. Some 1,200 periodicals, 8,000 government documents, 16,000 reels of film, numerous abstracts, 20,000 microfiche books on American Civilization already are part of the collection. The selection process also includes a full range of media materials--film, filmstrips, film loops, records, art prints, charts, maps, and audio and video tapes.

By opening day the total collection will number 150,000 items.

* * *

Turning to Evergreen's construction program:

Director of Facilities Planning Jerry Schillinger reports that the start of the three final 1969-71 biennium capital projects is nearing. Bids for the first phase of the recreation building will be opened March 25 by the State Division of Engineering and Architecture. Science building bids will be opened in April, along with the final site improvements-landscaping project.

Meanwhile, a thumbnail sketch of progress to date on other jobs:

Library - This project, now employing 158 workmen, is 61 per cent complete, with 19,600 cubic yards of concrete poured, 1,960 tons of reinforcing steel placed and 7 1/2 tons of structural steel erected. During February workmen completed part of the main roof and began pouring penthouse walls and columns. All structural concrete work should be finished in March and much interior work should be under way by month's end.

Site Improvements - This project is 66 per cent complete and remains on schedule despite the fact that adverse weather has slowed the work and cut crews to 35. Erection of the two water reservoirs was completed in February and work began on inside coating. Installation of the main switchgear for the power substation was

finished. February activity also included work on sewer laterals, utility trench walls, power conduits in the utility tunnel, curbs and gutters for roads, etc.

College Activities Building - Work is 15 per cent finished, with 44 employees on the job. Crews completed forming and pouring walls to the first floor during February and began forming first floor slab over the basement area. March activity will include forming and pouring of footings at the west end of the building, plus first floor and roof slab work.

Student Residential Center - Work is 35 per cent complete, with a crew of 77 on the job. Workmen have poured 3,300 cubic yards of concrete, erected 65 tons of structural steel and placed 495 tons of reinforcing steel in the four-building complex. February work included completion of concrete floors and walls to roofs of the five-story buildings and completion of concrete walls and floors to the sixth floor of the ten-story structure. Similar work will continue through March.

Large Group Instructional Center - This project is 23 per cent complete, with 25 workmen on the job. Crews have poured 578 cubic yards of concrete, erected four tons of structural steel and placed 70 tons of reinforcing steel. February work included forming and pouring of architectural concrete walls, forming of elevated slabs and erecting of structural steel roof members. Similar work will continue during March.

Central Utilities Plant - Work is 34 per cent complete with 23 men on the job. Crews have poured 1,551 cubic yards of concrete and placed 232 tons of reinforcing steel. February activity included forming and pouring concrete walls, pouring of part of the roof deck, setting two fuel tanks in place, installing piping, and electrical rough-in. March work will continue in the same areas, plus installation of chillers.

Shops and Garages - This project was completed late in February and final inspection held.

* * *

Plans for the proposed Evergreen Parkway from the Aberdeen Freeway to the south end of the college campus were reviewed during a public hearing in early February. The proposal now goes to the State Highways Commission for final review. As outlined at the hearing, the parkway would be a four-lane, limited access facility, designed for 50 mph traffic. The plan calls for removal of as little vegetation as possible, landscaping to repair natural damage, and provision for bicycle and foot traffic in park-like strips next to the roadway. Access would be provided through a full interchange at the Aberdeen and a partial interchange at the Old Shelton Highway. The project cost is estimated at \$5 million, which will be requested from the 1971 Legislature. If funds are approved, work could begin late this year, district highways officials said.

* * *

Evergreen's trustees have awarded a one-year food services contract to ARA Slater Company of Philadelphia. The contract contains annual renewal options for a five-year period, each to be exercised at the discretion of the college. Slater was one of five firms which submitted proposals for supplying cafeteria and library snack bar food services, vending machine operations and management of a retail food store in the college activities building. The contractor will begin joint planning of facilities and operations with college personnel as soon as the necessary legal papers are finalized. The company and college then will jointly select a manager for the food services operation. This person then will begin assisting college officials in the purchase

of small equipment items and other supplies so that all necessary services will be operational next September.

Trustees also have approved a contract with Northwest Interiors of Seattle for supplying carpets for the student residential center. The firm had submitted the low bid of \$77,840.

* * *

As most local residents are aware by now, Morningside, Inc., the activity center and sheltered workshop for Thurston and Mason Counties' retarded and handicapped, has formally launched its \$75,000 capital fund drive. If successful in this effort, Morningside will qualify for \$175,000 in state and federal funds, bringing to \$250,000 the amount available for construction of a new building west of Olympia and fairly close to the Evergreen campus. The need for success of this project is great because the amount of work that must be done is great. Anyone who is even remotely acquainted with Morningside knows that this is an agency that is really accomplishing something for a clientele too often discarded or ignored. Part of making our community a better place in which to live is assuring that endeavors such as Morningside receive the support they so richly deserve.

Morningside and Evergreen already have close ties. Two staff members, E. J. Shoben, Jr. and Dick Nichols, are members of the board of directors and are chairmen of two phases of the drive--college fund raising and public relations, respectively. In addition, Morningside already has performed two important tasks for the college at costs less than would have been the case had our staff done the work--preparation of the preliminary bulletin and catalog for mailing.

The goal from Evergreen in this fund drive is about \$1,500, or about \$12.50 per staff member. We've already raised \$200 in just a few advance gifts and should be able to collect the rest. Some at the college will give less than \$12.50; some will be able to give more. We hope that everyone can give something--even one dollar. Contact Dr. Shoben or Dick Nichols soon and let either of them know what you can do.

One final comment on this--in the form of a challenge. Just go visit Morningside (703 North Rogers Street). We'll bet you'll be so heart-warmed that you won't be able to refrain from helping.

* * *

Welcome aboard to some new members of the Evergreen family:

Arnold Doerksen, former purchasing specialist with The Boeing Company, has become our Purchasing Agent. Cheryl Anderson, formerly a customer service receptionist with King County Medical, is a new clerk-typist in academic planning. Patty Allen is pinch-hitting for Pat Baugh as library secretary until the legislative session ends. And, Jeanne M. Fasching has taken a temporary assignment as a typist and steno pool jack-of-all-trades for the next several weeks.

* * *

President Charles McCann and Registrar Perrin Smith have received some special recognition. President McCann has been appointed Washington's state representative to the American Association of State Colleges and Universities for 1971 and 1972, succeeding President Emerson Shuck of Eastern Washington State College. Smith has been named to

a standing committee of the American Association of Collegiate Registrars and Admissions officers. He will serve on the records and registration committee.

* * *

Evergreen's resident ecologist Al Wiedemann passes along the following item (the editor doesn't understand the long words but is willing to share his stupidity with everyone):

Spring is on the way and some of the plants of the Evergreen campus are beginning to show it in their sex life. In the forest, among the ferns and old maple leaves, can be found the small purple flowers of snowqueen (*Synthris reniformis*). Higher up, and more easily visible, the leaves of bitter cherry (*Prunus emarginata*) are coming out and the clusters of small white flowers are also beginning to show. The catkins of scoulers willow (*Salix scoulerina*) are obvious from most roads on the campus; and the male catkins of red alder (*Alnus rubra*), hanging for some time now, are beginning to shed pollen (which means the female catkins should be around soon). Two small plants are common along the roadsides and in cultivated places; chickweed (*Stellaria media*), which actually has tiny white flowers through the winter; and bitter cress (*Cardamine oligosperma*), which is just coming up and already is in flower.

Al says he's willing to issue an ecological report to the Newsletter each month. We accept, with thanks and respect for his knowledge.

* * *

Speaking of sex, and tossing in the timely topic of budget trouble, we feel duty bound to pass along the following tidbit, which was forwarded to us in the form of a news clipping from our favorite vice president and provost:

To help the state of Rhode Island out of a financial crisis, Rep. Bernard C. Gladstone (D-Providence) has proposed to the state legislature a tax on sexual intercourse. The bill provides that each male "over the age of puberty" be taxed \$2 per act. Calling it a "broad-based" tax, Gladstone estimated that 300,000 men and boys would pay an average of \$100 each year, bringing the state \$30 million annually. Gladstone introduced his bill after Governor Frank Lieht asked the General Assembly to enact a \$100 million personal income tax.

"It's time for a little bit of levity," Gladstone said, predicting that his proposal would be "one tax that would probably be overpaid." "The more you think about it, the more you realize the value of something of this nature. It's the most painless way of paying a tax."

Enforcement of the tax would be left to John H. Norbert, state tax administrator. "I'm stunned for words," said he.

When Gladstone moved for immediate consideration of his bill, House Speaker Joseph A. Bevilacqua asked whether the tax would apply to Rhode Islanders outside the state. Gladstone explained that only acts of sexual intercourse occurring in Rhode Island, either by residents or visitors, could be taxed. The speaker ordered the bill held on his desk pending appointment of committees for the new legislature.

And so goes the serious business of lawmaking in Rhode Island.

* * *

PEOPLE POTPOURRI

Paul Zimmerman is looking for a woodstove (cheap) or cookstove (cheap) with oven hot water hookup, if possible. Call 352-3058 or 753-3136...Willi Unsoeld will be keynote speaker at Oregon State University's Science-Humanities Symposium March 11, delivering an address entitled "Can Man Adapt?"...Utilities Production Supervisor Texas Cornish and his wife Billie have moved into an apartment and are busy looking for a permanent home. Texas has a busy month ahead in connection with development of the utilities plant; Billie, meanwhile, has become a medical secretary at St. Peter Hospital...Executive Vice President E. J. Shoben, Jr., will deliver a paper at the 26th National Conference on Higher Education of the American Association of Higher Education in Chicago March 14-17. He also will give the keynote at the March 21-24 Veterans Administration Cooperative Studies in Mental Health and Behavioral Sciences Conference in St. Louis...Richard Jones will be the featured speaker at a March 31 symposium entitled "Public Education and the Mental Health Sciences," sponsored by the Hahnemann Medical College and Hospital of Philadelphia...Al Wiedemann will visit more community colleges as part of the student recruiting effort this month, traveling to Peninsula (Port Angeles) March 3, Clark (Vancouver) March 5, Skagit Valley (Mt. Vernon) March 9, Everett, March 10...Beryl Crowe will participate in several activities at Kansas colleges between March 1 and 5. He'll join a Kansas Council of Churches task force at Kansas Wesleyan University (Selina), an environmental symposium of the Associated Colleges of Central Kansas at Bethel College (North Newton) and in a symposium entitled "Protestantism, Eco-Crisis and the New Reformation" at McPherson College...Jim Long is an active participant in the local Cooperative Campus Ministry, which is working to solidify ties between Evergreen and local churches...The Thurston County Educational Secretaries organization will meet for lunch at Evergreen on March 18. Evergreen secretaries are encouraged to attend the meeting and join the organization. June Kislner (3410) has all the information...Dick Nichols has been appointed to the Attitude Survey Interpretive Committee of the Olympia Junior Chamber of Commerce. The committee will look at the kinds of community activities that might be implemented as a result of needs expressed in the attitude survey conducted by the Jaycees...And congratulations to two new Evergreen papas. Larry Eickstaedt's four-month old adopted son Christopher Lee and Richard Jones' month-old son Gabriel Warren are the newest Evergreen offsprings.

CALENDAR OF EVENTS

(March 1 - 31)

Monday, March 1

- E. J. Shoben, Jr. - To Washington to attend Commission on Liberal Learning and Association of American Colleges meetings and deliver proposals to federal funding agencies (through March 4).
- David Barry - Speech to Yelm Lions Club, 7:00 p.m.
- Jim Holly - Meet with Durham, Anderson, Freed Architects, Seattle.
- Norm Johnson - Meet with Bumgardner Partnership and Durham, Anderson, and Freed Architects, Seattle.
- Beryl Crowe - Meetings at Kansas colleges through March 5 (see Potpourri).

Tuesday, March 2

- Interinstitutional Purchasing Officers meeting at Evergreen (also March 3).
- Norm Johnson - Interinstitutional Committee of Architects and Physical Plant Directors, University of Washington.
- Sheila Hoey - Speech to New Careers class at U.P.S. on Contracted Studies at Evergreen.

Wednesday, March 3

- Dean Clabaugh, Bob Sethre, Dick Nichols - Legislative liaison meeting, 1:30 p.m., WEA building.
- Ken Winkley - Interinstitutional meeting on Indirect Costs, University of Washington.
- Al Wiedemann - Visit to Peninsula College, Port Angeles.

Thursday, March 4

- President's Council meeting, 12:00 - 2:00 p.m.
- Business Directors Council meeting, 2:30 p.m.
- Bid opening, Student Residences student room furniture, at TESC, 2:00 p.m.
- Texas Cornish - Meeting with engineers, Seattle.

Friday, March 5

- Dean Clabaugh - System Policy Committee meeting, 9:30 a.m., Tyee.
- Al Wiedemann - Visit to Clark College, Vancouver

Tuesday, March 9

- Al Wiedemann - Visit to Skagit Valley College, Mt. Vernon.
Willi Unsoeld - Deliver Everest lecture, Ft. Steilacoom College.

Wednesday, March 10

- Al Wiedemann - Visit to Everett College.
Dean Clabaugh, Bob Sethre, Dick Nichols - Legislative liaison meeting, 1:30 p.m.,
WEA Building

Thursday, March 11

- President's Council, 12:00 - 2:00 p.m.
Business Directors Council, 2:30 p.m.
Carl Brown - Attend Tacoma Urban Coalition meeting.
Al Wiedemann - Conference of Washington Department of Audio-Tutorial
Instruction.
Texas Cornish - Meeting with engineers in Seattle.
Willi Unsoeld - Speaker at Lake Oswego, Oregon and keynoter for Oregon State
University symposium.

Friday, March 12

- Jim Holly, Monica Caulfield, Pat Matheny, Chuck Davies, Connie Hubbard - Washington
Department of Audiovisual Spring Conference, Bellevue.

Saturday, March 13

- Willi Unsoeld - Visiting Professor on Innovative Education to Bucknell
University (also March 14 and 15).

Monday, March 15

- E. J. Shoben, Jr. - Attend National Conference of the American Association of
Higher Education, Chicago (through March 17).
Dick Nichols - Speech to Pe Ell Kiwanis Club, 6:30 p.m.

Tuesday, March 16

- Carl Brown - Higher Education Personnel Board meeting, Ft. Steilacoom
Community College, 10:00 a.m.

Wednesday, March 17

- Dean Clabaugh, Bob Sethre, Dick Nichols - Legislative liaison meeting, 1:30 p.m.,
WEA Building

Thursday, March 18

Dick Nichols - Speech to Thurston County Educational Secretaries meeting at TESC, 12:00 noon.

President's Council meeting, 12:00 - 2:00 p.m.

Texas Cornish - Meeting with engineers in Seattle.

Monday, March 22

E. J. Shoben, Jr. - Attend Veterans Administration Conference and visit Danforth Foundation, St. Louis, Missouri.

Tuesday, March 23

Board of Trustees Retreat

Wednesday, March 24

Board of Trustees meeting.

Thursday, March 25

President's Council, 12:00 - 2:00 p.m.

Texas Cornish - Meeting with engineers in Seattle.

Wednesday, March 31

Richard Jones - Attend symposium, Philadelphia, Pa.

Dean Clabuagh, Bob Sehtre, Dick Nichols - Legislative liaison meeting, WEA Building, 1:30 p.m.
